ACCESSORIES

E-STOP MODULE

The **Gulmay E-Stop Module** is a desktop housing containing a key switch and emergency stop button designed for use in digital Gulmay sub-systems. The module connects to the Gulmay Lab I/O box and provides a convenient solution in standalone x-ray systems.

Gulmay is a leading manufacturer of x-ray generators and controllers and offers components and complete sub-systems to OEM system manufacturers globally and through its network of experienced distributors.
